Interactive Remote Demonstration

By Tod Raines

Direct from my shop to your club or your home

- Multi-camera views
- High quality video and audio
- High-Definition Zoom meeting
- Max 300 participants
- Full HD edited replay video
- 6 months of free replays
- Multiple project-based topics
- Affordable – no travel expenses

Some of the demonstration topics include:

	Piston Box This demonstration will show how to make a piston box. This is a cylinder box made hollow using forstner drill bits. There will be some room for some individual design decisions on the style and form of the box. This demo takes 1.5-2 hours.		**Turn a Bowl in a Bowl** I will demonstrate the turning of a bowl with another bowl inside, using off center turning techniques. This demo takes 2 hours.
	Hook Tool – End Grain Hollowing I turn an end grain vessel from start to finish. This focus will be on hook tool usage, techniques, maintenance, advantage, and limitations. This demo takes 1.5-2 hours.		**Small Plates – Face Grain & End Grain** I will show the turning of two small plates. One using face grain wood which will require three work-holding positions. The second plate will be turned end grain and may require jam chucking. This demo takes 1.5 – 2 hours.
	Oval Box This project creates an oval box by laying out an oval pattern based on a rectangular block of wood. Note – the sphere turning is not part of this demo. This demo takes about 1.5 – 2 hours.		**Bowl Turning – Orientations and Techniques** I'll show the different methods of holding and turning of traditional, natural edge bowls. I will demonstrate the turning of the two bowls with emphasis on form, grain orientation and visual appeal. This demo takes 1.5-2 hours.

	Fantastic Kitchen Utensils: Spatula & Spoon I show how to make a spatula and spoon with a couple of fantastic features. I will take you through the whole turning process. This demo takes about 2 hours			**Small Wine Glass** This small wine glass turning where I use Ash and then treat the surface with dye and colored grain fillers to get a striking effect. This demo takes 1.5-2 hours.
	Turning a Sphere – without an expensive jig I have a simple step by step method that give you practice along the way to create a perfect sphere. This demo takes about 1 - 1.5 hours.			**Small Bud Vase** Sometimes called a weed pot but this smaller vase has a unique feature of an inserted 10 mm x 75 mm test tube which allows this weed pot to hold water and thus can support a small living bud, such as a flower. This demo takes about 1.5 hours.

Please feel free to call and chat about my fee and this opportunity to share woodturning with your members.

Happy turning,
Tod
